I have worked with Robert Krause of KSI for several years on projects in the Omaha and Kansas City markets. Robert has always been a pleasure to work with. Our clients have always been very pleased with the finished project that he produces.

From our standpoint, Robert sets himself apart from other contractors. He meets all of the normal guidelines of completing the project on time, maintaining budgets and so forth. Further, Robert is a "team player", a problem solver and a great project planner. Robert's primary focus is that of serving his clients. However, he knows that do so, he must think ahead, be cooperative with the design team and financial institutions involved, and work through any issues that arise. Robert has proven himself to be invaluable to our clients.

Robert has always maintained the agreed to project budgets and normally delivers projects slightly ahead of schedule. This has always been another bonus for our clients.

Should you have any specific questions about my experiences with Robert and his team, please feel free to contact me at any time.

Respectfully submitted,

R. Mark Naylor
Principal
